CyberRecon Suite: Expanded Roadmap (v1.3+)

■ Current Features:

- Integrated Wireshark, Nmap, Burp-like proxy, Splunk log analysis
- Dark mode UI with modular/responsive panels
- Real-time network mapping and scan visualization
- SIEM tools: Wazuh, ELK Stack, Splunk Dashboards
- EDR-style dashboards and endpoint monitoring
- Firewall GUI (Linux UFW / Windows netsh)
- Nessus API support, Snort IDS with rule manager
- Threat intelligence feeds from Abuse.ch, OTX, etc.
- Vulnerability scanning (OpenVAS, Nmap NSE)
- Security tool integrations: SQLMap, Nikto, Recon-ng, etc.
- Pentester tab with togglable modern tools and sandboxing
- Auto-updating modules and offline-ready installer
- PDF & interactive roadmap + signed .exe + AppImage builds

■ Future Roadmap Goals (v1.4+)

- Machine learning for anomaly detection & threat scoring
- SOAR automation workflows and alert response
- Compliance report generation: HIPAA, GDPR, NIST, etc.
- Custom dashboard builder (drag-and-drop)
- Mobile recon module (USB Android/iOS scanning)
- Live forensics tools (memory dump, browser artifact extraction)
- Agent-based endpoint scanner + deployer
- Cloud connector for AWS, Azure, GCP asset auditing
- Integrated MITRE ATT&CK; correlation and tactic views
- Multi-user access, session audit logging, alerting
